

First Texas Monetary Conference

University of Texas at Austin

1993

There are no known records of the formal program from the first conference at UT Austin in 1993. Based on conversations with attendees at that conference we know that the presenters included Bruce D. Smith (then at Cornell University), Neil Wallace (University of Minnesota), Michael Woodford (University of Chicago – he presented “Real effects of monetary shocks in an economy with sequential purchases” (with Robert E. Lucas), Randall Wright, Owen Lamont, Eduardo Engel and Simon Gilchrist. The discussants included Preston McAfee (UT Austin) (who discussed Wright’s paper) and Nathan Balke (SMU).
